Experience

Cloud Computing Virtual Intern

Sep 2025 – Nov 2025

PBEL (IBM CEP)

[Certificate](#) ↗

- Completed IBM Cloud fundamentals covering cloud architecture, IaaS/PaaS deployment models, and containerization.
- Deployed workloads using virtual machines and IBM Cloud services; applied networking and storage configuration concepts.

Projects

ScamShield AI

[Live Demo](#) ↗

[GitHub](#) ↗

2026

- Built an AI-powered fraud detection web app targeting Indian job seekers, integrating a **6-step autonomous agent pipeline** using Google Agent Development Kit (ADK) and Vertex AI Agent Builder.
- Implemented multilingual OCR (English + Hindi via Tesseract) to extract and analyse text from suspicious job screenshots and documents.
- Engineered semantic search with **MongoDB Atlas vector embeddings** to match queries against a scam pattern database; integrated Gemini 2.5 Flash for natural language reasoning and risk scoring.
- Tech Stack:** React, Vite, Node.js, Express, MongoDB Atlas, Google ADK, Vertex AI, Gemini 2.5 Flash, Tesseract OCR, Docker, Vercel.

HiringRadar

[Live Demo](#) ↗

2026

- Built and deployed a semantic job-matching platform that scrapes Greenhouse and Lever ATS boards and delivers personalized alerts via Telegram, using **sentence-transformers** embeddings and cosine similarity for candidate-job matching.
- Designed a hybrid semantic + keyword matching pipeline with experience-level and location filtering; deployed on Railway with a Supabase (PostgreSQL) backend.
- Grew to **44 active subscribers**; iterating on match-score calibration to align raw similarity output with real user-perceived relevance.
- Tech Stack:** Python, sentence-transformers, aiogram, Supabase (PostgreSQL), BeautifulSoup, Railway.

Distributed Task Orchestrator

[Live Demo](#) ↗

[GitHub](#) ↗

2025

- Developed a full-stack MERN application with real-time CRUD operations and persistent MongoDB storage.
- Containerized frontend and backend using Docker and Docker Compose, reducing environment setup time by **80%**.
- Configured service networking, environment-based secrets management, and a production-like multi-container architecture.
- Tech Stack:** React, Node.js, Express, MongoDB, Docker, Docker Compose.

Skills and Technologies

Languages: Java, Python, JavaScript, C, SQL

AI / ML: Gemini API, Vertex AI, Google ADK, Vector Embeddings, RAG pipelines, NLP (Tesseract OCR), sentence-transformers

Frontend: React.js, Vite, HTML, CSS

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB Atlas, MySQL, PostgreSQL (Supabase)

DevOps & Cloud: Docker, Docker Compose, Google cloud, Vercel, Render, Git, GitHub

CS Fundamentals: Data Structures & Algorithms (Java), OOP, DBMS, Operating Systems, Computer Networks

Certifications

- Python Programming** — IIT Kanpur
- Cloud Computing Internship** — PBEL (IBM CEP)

[Certificate](#) ↗

[Certificate](#) ↗

Education

United College of Engineering and Research, Prayagraj (AKTU)

B.Tech in Computer Science and Engineering

2023 – 2027
